Clinical Team Spaces-Nurse Stations

Clinical Team Spaces

As the healthcare industry undergoes rapid change, the care team is often stretched thin, working in noisy, busy environments.

For organizations that are actively driving improvement through their operations, clinician workplaces can be a strategic asset supporting a more effective organization.

Considering the cognitive, physical and emotional needs of the care staff, can reduce the risk of costly errors and staff burnout.

Nurse Stations

NS

Planning Ideas- Option 1

Application Includes

- Montage panels
- Sync
- Pocket cart
- Amia seating
- Universal storage

Details

1. Monitor arms, CPU holders, and desk height power provide ergonomic, convenient, and efficient solutions to clinicians.
2. Locking storage placed behind clinical staff allows for quick and convenient access to storage and supplies.
3. Montage panels provide a space to dock Pocket carts and charge technology between uses.

Nurse Stations

Planning Ideas- Option 2

NS _2a

Application Includes

- Sync
- Amia seating
- Elective Elements storage
- Duo tall storage
- Post and Beam
- Slatwall
- Soto worktools

Details

1. The transaction counter provides a place for visitors to approach staff with questions. Staff also uses this surface as a touchdown space when in route from one patient to another patient.
2. Duo tall storage creates additional privacy between users while providing increased storage space.
3. Slatwall allows staff to customize their workspace and provides an area for frequently accessed items.

Nurse Stations

Planning Ideas- Option 3

NS_3a

Application Includes

- Convey modular casework
- Cachet seating
- Sync
- Amia seating
- Tour
- Node seating
- Verge stools
- Universal storage
- Pocket cart

Details

1. The foot ring offers comfort to clinical staff who walk many miles per shift. This welcome change of posture is an ergonomic benefit.
2. Convey is fully modular solution, allowing for simple installation, minimal disruption and the ability to repurpose components later.
3. Blending both standing and seated height solutions provides users a healthy palette of posture and choices to meet and work.

Nurse Stations

NS_4a

Planning Ideas- Option 4

Application Includes

- Convey modular casework
- Montage
- Pocket cart
- Verge stools
- Exchange table
- Sync
- Amia seating
- Universal worksurfaces
- Flow markerboard

Details

1. An ADA transaction counter is shown here, accommodating all users in the space. This serves as a spot for visitors to easily approach staff with questions.
2. The foot ring offers comfort to clinical staff who walk many miles per shift. This welcome change of posture is an ergonomic benefit.
3. This collaborative space supports clinician conversation, such as shift change and impromptu consultations.

Nurse Stations

NS_5a

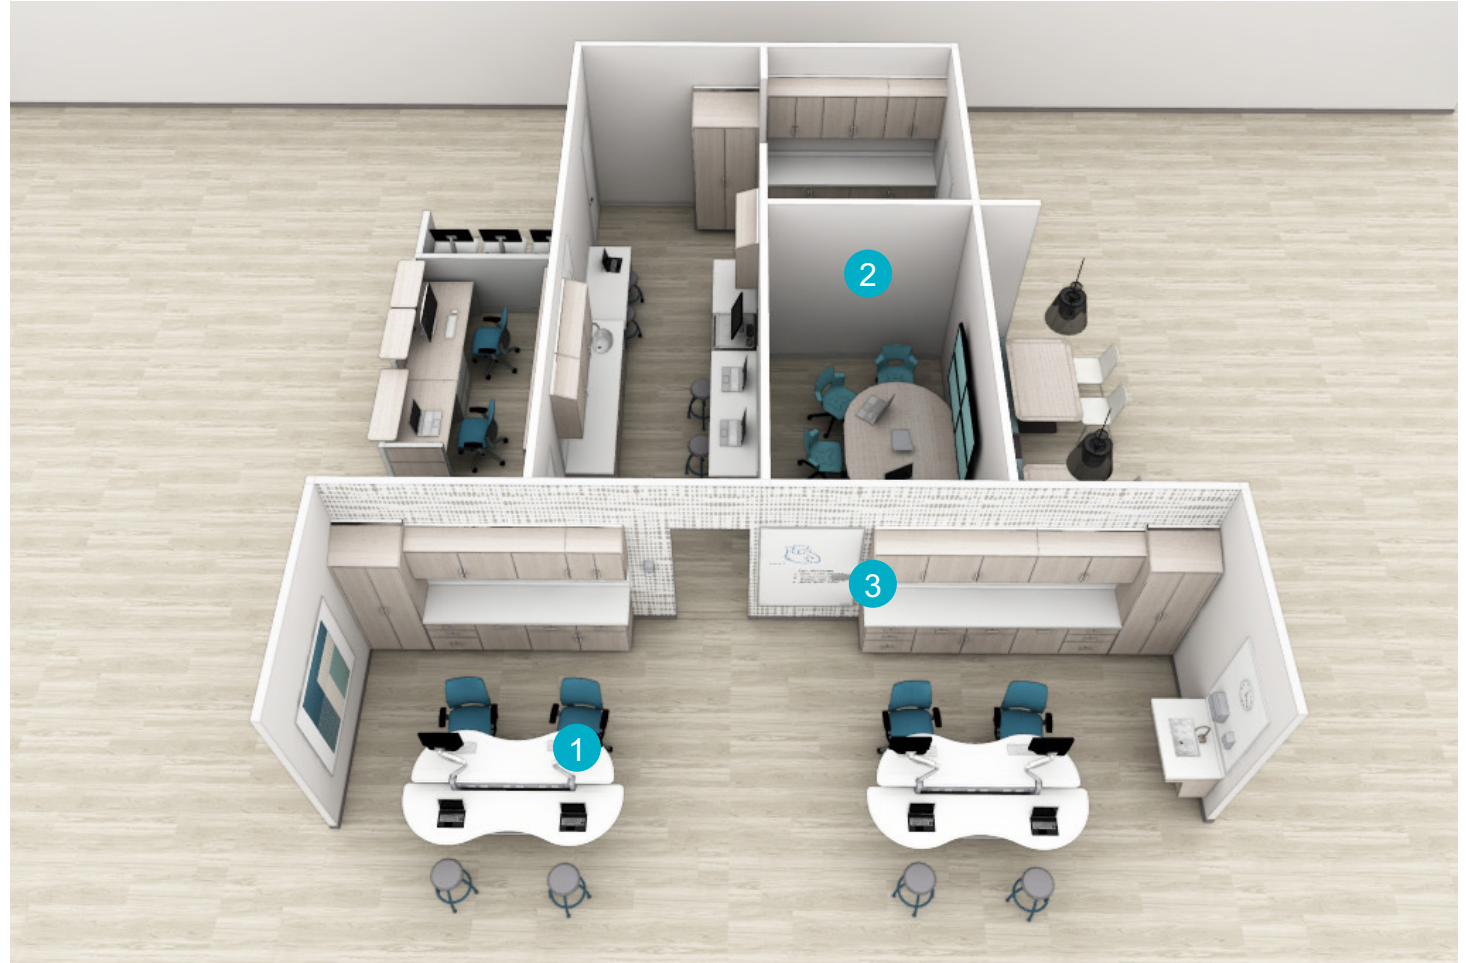

Planning Ideas- Option 5

Application Includes

- Convey modular casework
- Montage panels
- Sync
- Verge stools
- Surround seating
- Pocket cart
- Media:scape
- Amia seating
- Shortcut seating
- Universal storage
- Lagunitas table
- Nooi seating

Details

1. This collaborative space supports clinician conversation, such as shift change and impromptu consultations.
2. Often, sensitive information needs to be shared in private, closed-off rooms so that the content is not visible to all.
3. With supplies and utilities in easy reach, clinicians can focus on patients and families.

Nurse Stations

Planning Ideas- Option 6

NS_6a

Application Includes

- Convey modular casework
- Montage panels
- Amia seating
- Flow markerboard

Details

1. The transaction counter provides a place for visitors to approach staff with questions. Staff also uses this surface as a touchdown space when in route from one patient to another patient.
2. Placing a handwashing sink near helps to remind clinical staff to frequently wash their hands.

Nurse Stations

Planning Ideas- Option 7

NS_7a

Application Includes

- Montage panels
- Convey modular casework
- Verge stools
- Exchange table
- Pocket cart
- Universal surfaces & storage
- Amia seating

Details

1. The transaction counter provides a place for visitors to approach staff with questions. Staff also uses this surface as a touchdown space when in route from one patient to another patient.
2. The foot ring offers comfort to clinical staff who walk many miles per shift. This welcome change of posture is an ergonomic benefit.
3. This collaborative space supports clinician conversation, such as shift change and impromptu consultations.

Nurse Stations

NS_8a

Planning Ideas- Option 8

Application Includes

- Montage panels
- Convey modular casework
- Universal surfaces & storage
- Amia seating

Details

1. The transaction counter provides a place for visitors to approach staff with questions. Staff also uses this surface as a touchdown space when en route from one patient to another patient.
2. Monitor arms, CPU holders, and desk height power provide ergonomic, convenient, and efficient solutions to clinicians.
