

PATIENT ROOMS

A collection of thought starter ideas

Patient Rooms

Patient Rooms

Family members need an intuitive, welcoming and hosted environment to support activities of daily living as well as an environment that helps cue behaviors for them to productively partner with clinicians.

Family presence + involvement is beneficial. Yet family needs are not fully supported in the patient room:

- Uncomfortable Sleeping + Resting
- Crowded Eating + Socializing
- No Space for Personal Items
- No Space for Teaching + Learning
- Challenging to Stay Connected to Work + Life Outside the Hospital

Ways to Support Family Involvement

- Have a designated space
- Accommodate for frequent + inclusive communication
- Facilitate a range of activities for daily living
- Offer choice + control for seated postures
- Optimize spatial efficiency + cleanability
- Support clinician requirements

PATIENT ROOM

Option 1

Concept

This patient room solution supports the primary user—the patient, while also accommodating the needs of the caregiver in a flexible, comfortable and integrated manner. One side of room supports the clinicians, while the other side of room is designed for patient and caregiver use. Guests have ample space to sit and place their personal belongings, creating a more comfortable and personable healthcare environment.

PATIENT ROOM

Option 1

PT_1a

Application Includes

- Convey modular casework
- Verge stool
- Pocket mobile cart
- Polyvision whiteboard

Details

1. Additional workspace allows a dedicated space for family members to work, while also providing a place to set patient personal items.
2. Teaching and learning are essential components of the entire healthcare journey, requiring multiple ways of sharing and displaying information. A whiteboard, reserved for family, provides a place to place for

questions or messages for staff. It's also ideal for communication during physician consultations.

3. Pocket mobile cart allows for easy sharing of information and encourages collaboration and communication between clinician and patient.

PATIENT ROOM

PT_1b

Option 1

Application Includes

- Sieste sofa sleeper
- Mineral recliner
- Opus overbed table
- Designtex performance textiles

Details

1. The Opus overbed table is central to activity and interactions in the patient room. Positioned next to the patient bed, it provides a convenient, adjustable surface for meals and other tasks, in combination with a surface for clinician use.
2. A recliner in a patient room setting provides a comfortable place for patients to sit, while also representing the progression of healing.

PATIENT ROOM

PT_1c

Option 1

Application Includes

- Sieste sofa sleeper
- Mineral recliner
- Opus overbed table
- Senza bedside table
- Designtex performance textiles

Details

1. Clean and classic, a Senza bedside table enhances the patient room experience by accommodating and storing the patient's personal items in a convenient, compact location that is easy to clean.
2. Biophilic images incorporate nature into this patient room setting and can help reduce patient stress and anxiety.
3. A Sieste sleeper sofa provides a sleep surface that is separate from the seat surface for overnight visitors.

PATIENT ROOM

Option 2

Concept

This patient room solution supports the primary user—the patient, while also accommodating the needs of the caregiver in a flexible, comfortable and integrated manner. One side of room supports the clinicians and includes storage, med prep and charting; the other side of room is designed for patient and caregiver use. Guests have ample space to sit and place their personal belongings, creating a more comfortable and personable healthcare environment.

PATIENT ROOM

PT_2a

Option 2

Application Includes

- Convey modular casework
- Verb personal whiteboard
- Cura seating

Details

1. The footwall in the patient room provides the patient with positive distraction, storage for personal and commonly used items, and access to information.
2. A whiteboard, reserved for family, provides a place to write questions or leave messages for staff; it's also ideal for quick sketches and notes during physician consultations.

PATIENT ROOM

PT_2b

Option 2

Application Includes

- Convey modular casework
- Embold side table
- Relay adjustable monitor arm
- Designtex performance textiles
- Cura seating
- Verge stool
- Park mobile cabinet
- X-tenz sofa sleeper

Details

1. A sink near the entry promotes handwashing upon entrance and exit of the patient room, which helps with infection control.
2. A taller-than-average bedside table makes personal items more accessible to the patient.
3. A sleeper sofa offers a comfortable place in the room for a care partner to rest during the day or at night while visiting a patient.

PATIENT ROOM

PT_2c

Option 2

Application Includes

- Relay adjustable monitor arm • Designtex performance textiles
- Cura seating
- Verge stool
- Park mobile cabinet
- X-tenz sofa sleeper
- Embold side table

Details

1. Relay height adjustable monitor arm brings technology tools up close for easier viewing, supporting clinician work in an ergonomic posture.
2. Extendable sleeper provides seating for visitor, as well as a bed for overnight visitors.
3. A Cura chair is ideal for comfort, while helping relieve anxiety through its flexible back.

PATIENT ROOM

Option 3

Concept

Small details in a patient room can make a big difference in overall patient wellbeing, staff efficiency, and care partner accommodations. This patient room shows efficiency in overall layout, provides necessary storage for both the clinician and the patient's personal belongings, while also supporting the care partner.

PATIENT ROOM

Option 3

PT_3a

Application Includes

- Convey modular casework
- Premium Whiteboard

Details

1. Wall-suspended cabinets provide ample storage, while allowing cleaning to easily be done underneath the cabinets, which aids in infection control.
2. Visual access to information and space for personal items are important to help reduce patient anxiety.

PATIENT ROOM

PT_3b

Option 3

Application Includes

- Mitra recliner
- Opus bedside table
- Surround sofa sleeper
- Designtex performance textiles

Details

1. The Mitra recliner transitions with ease to support rest or sleep in the patient room. Mitra balances a residential feel with performance features that can contribute to a feeling of comfort while meeting important healthcare needs.
2. The familiarity of a sofa setting helps bring some of the comforts of home to the patient room. Guests have ample space to sit, sleep or lounge, creating a more comfortable and supportive atmosphere.

PATIENT ROOM

Option 3

PT_3c

Application Includes

- Mitra recliner
- Opus bedside table
- Convey modular casework
- Relay adjustable arm
- Designtex performance textiles

Details

1. ADA height counter with a handwashing sink located directly by the room's entrance, supports infection control that contributes to the patient's health and safety during their visit.
2. Upper cabinet for clinician storage minimizes visual clutter while keeping frequently used items within easy reach.

PATIENT ROOM

Option 4

Concept

Patient rooms are more than just a place for a bed and medical equipment. They are environments that must serve as a temporary home for patients to heal and family members to be supported, be a workspace for clinicians, and a destination for visitors. This patient room is a comfortable and healing setting for the patient, and accommodates the care partners' need for rest, work and being close to their loved one.

PATIENT ROOM

Option 4

PT_4a

Application Includes

- Convey modular casework
- Verge stool
- X-tenz sleeper sofa
- Cura seating and footrest
- Aspekt side table
- Opus bedside table
- Pocket cart
- Overbed table
- Ology height adjustable desk
- Nooi chair

Details

1. The Pocket mobile cart allows work or technology to move where it is needed.
2. The Cura chair's passive flex frame encourages movement and accommodates subtle adjustments and nervous energy, while aiding in overall circulation.
3. Upper storage provides space for necessary equipment and easy access to medical supplies when needed.
4. Biophilic images incorporate nature into this patient room setting and can help reduce patient stress and anxiety.

PATIENT ROOM

PT_4b

Option 4

Application Includes

- Convey modular casework
- Verge stool
- X-tenz sleeper sofa
- Cura seating and footrest
- Aspekt side table
- Opus bedside table
- Pocket cart
- Overbed table
- Ology height adjustable desk
- Nooi chair

Details

1. An adjustable height desk provides an ergonomic touchdown space for any visitor needing to get work done while visiting.
2. The Verge stool provides a quick and comfortable place to sit as clinicians collaborate and connect with patients and families.
3. X-tenz sleeper sofa folds out into a sleep surface, accommodating family members and care partners with a comfortable night's rest.

PATIENT ROOM

Option 5

Concept

Patients feel comfortable knowing that their loved ones are also cared for and supported in this space. This patient room is an efficient space where clinicians can move around freely and engage effectively with the patient and care partners, creating the most value out of the time they spend in the room. Appropriate use of furniture supports the care partners in every way, offering a place to spend time with each other, rest, be productive, host other guests, and communicate with clinicians.

PATIENT ROOM

Option 5

PT_5a

Application Includes

- Opus casework
- Surround sleeper sofa
- Universal surface and supports
- Node chair

Details

1. Surround sofa offers flexible seating options as well as a place for personal items up off the floor within the patient room. A mobile multi-use surface for care partners is a convenient place for note taking.
2. Opus offers patients and care partners choice and control by creating places that accommodate important personal items.
3. An integrated markerboard allows care partners and clinicians to make important notes, or to communicate with one another when someone is not in the room.

PATIENT ROOM

Option 5

PT_5b

Application Includes

- Opus casework
- Surround sleeper sofa
- Universal surface and supports
- Node chair

Details

1. Surround's tablet arm offers a flexible and convenient place for patients/families to engage and take notes when consulting with the clinician.
2. Empath recliner is a comfortable and easily accessible choice for the patient when not wanting to sit in the patient bed. When not in use by the patient, it can serve as additional seating for a care partner.
3. Calming artwork helps create a residential aesthetic in the space and can help reduce patient stress and anxiety.

PATIENT ROOM

Option 6

Concept

Shorter stays in patient rooms for low acuity patients are becoming more common. Having a private space to retreat to improves patient satisfaction. In this low acuity patient room there is seating for care partners, as well as the necessary medical equipment, and workspace for care partners.

PATIENT ROOM

PT_6a

Option 6

Application Includes

- Convey modular casework
- Node chair
- Embold seating and table
- Sync
- Universal storage

Details

1. Embold seating provides a comfortable and easily cleanable seat for guests without sacrificing beauty, making a sometimes-sterile space feel more aesthetically pleasing.
2. Universal storage with a nonwoven fabric cushion top provides storage space for the patient's personal belongings, while also serving as overflow seating for visitors.
3. A handwashing sink placed within view of the room's entrance helps remind clinical staff and visitors to wash their hands each time they enter and leave the patient room, which aids in infection control.

PATIENT ROOM

PT_6b

Option 6

Application Includes

- Convey modular casework
- Node chair
- Embold seating and table
- Sync
- Universal storage

Details

1. Offering a space for care partners to be able work, stay connected and charge their personal devices during a patient's stay plays an important role in the patient room.
2. A small table provides a location for personal items in the exam space.
3. A Sync unit placed outside of the patient room allows clinicians to easily keep an eye on the patient, without entering and disturbing the patient or their family.

PATIENT ROOM

Option 7

Concept

This patient room has been divided into three zones: the clinician zone, the family zone, and the patient zone. The clinician zone is strategically located near the entrance of the room to foster efficiency, while providing the least amount of disruption to the patient and family members. A small desk is placed in the family zone to provide a dedicated workspace to care partners, when needed.

PATIENT ROOM

PT_7a

Option 7

Application Includes

- Surround sleeper sofa
- Empath recliner
- Node seating
- Opus casework
- Relay adjustable monitor arm
- Verge stool
- Designtex performance textiles

Details

1. Secured to the wall, the Relay monitor arm offers a screen that can be easily adjusted. The monitor can be positioned so the clinician have a direct line of sight to the patient while charting, or it can be rotated toward the patient and care partner for teaching and learning in the space.
2. A Surround sofa offers flexible seating options as well as a place up off the floor for personal items within the patient room.
3. An integrated markerboard allows care partners and clinicians to make important notes, or to communicate with one another when someone is not in the room.

PATIENT ROOM

PT_7b

Option 7

Application Includes

- Surround sleeper sofa
- Empath recliner
- Node seating
- Opus casework
- Relay adjustable monitor arm
- Verge stool
- Designtex performance textiles

Details

1. Opus casework provides a dedicated space for family members or care partners to work, read, or eat.
2. Surrounds tablet arm is a multi-use surface for care partners that supports note-taking or offers a place for personal items.
3. Calming artwork helps create a residential aesthetic in the space and can help reduce patient stress and anxiety.

PATIENT ROOM

Option 8

Concept

Making a mother comfortable as a patient is the top priority in this labor and delivery patient room layout. The clinician zone is tucked out of sight from the patient to provide less distracting and give a sense of privacy, while allowing the clinicians to still be close by for proper patient care. A labor tub is provided in the room to assist with pain relief during the early stages of labor.

PATIENT ROOM

Option 8

PT_8a

Application Includes

- Surround seating
- Convey modular casework
- Opus bedside table
- Verge stool
- Designtex performance textiles

Details

1. Surround sofa offers flexible seating options as well as a place for personal items up off the floor within the patient room. Specified with a tablet arm, a mobile multi-use surface for care partners is a convenient place for a variety of functions.
2. With supplies and utilities within easy reach, clinicians can focus on patient care while still providing a sense of privacy when needed during labor.
3. Artwork that incorporates nature can help reduce stress and anxiety for patients and care partners.

PATIENT ROOM

PT_8b

Option 8

Application Includes

- Surround seating
- Convey modular casework
- Opus bedside table
- Verge stool
- Designtex performance textiles

Details

1. The Verge stool provides a quick, convenient and comfortable place to sit as clinicians collaborate and connect with patients and families. It can be easily and safely tucked under the worksurface when not in use.
2. Convey is a fully modular solution, allowing for simple installation, minimal disruption and the ability to repurpose components later.
3. A handwashing sink placed within view of the entrance helps remind clinical staff to wash their hands each time they enter and leave the patient room.

PATIENT ROOM

Option 9

Concept

With everything close at hand, this NICU room is a comfortable setting where the family can feel welcomed as active partners in their baby's care. This room is also an efficient space where clinicians can move around freely and engage effectively with the infant and family members, creating a highly communicative and collaborative environment of care.

PATIENT ROOM

PT_9a

Option 9

Application Includes

- Empath recliner
- Surround sleeper sofa
- Convey modular casework
- Move chair

Details

1. Surround sofa offers flexible seating options as well as a place up off the floor for personal items within the patient room.
2. Convey is a fully modular casework solution, allowing for simple installation, minimal disruption and the ability to reconfigure and repurpose components later, if needed.
3. Calming artwork helps create a residential aesthetic in the space and can help reduce patient stress and anxiety.

PATIENT ROOM

PT_9b

Option 9

Application Includes

- Empath recliner
- Surround sleeper sofa
- Convey modular casework
- Move chair

Details

1. Empath recliner is a comfortable and easily accessible chair for parents and family members to help support interaction with the infant.
2. Access to outlets allows users to keep their devices charged in order to update friends and family who may not be present with them in the space.
3. Technology is a tool used for both teaching and learning and should be able to be viewed by all users in the space.

THANK YOU
